Profile

Passionate Software Developer with expertise in Full Stack Development, Python, and modern web technologies. Eager to apply problem-solving skills and creativity to contribute to organizational success while advancing personal and professional growth.

Education

(SSLC), Royal Concorde International School - Apr, 2018 -Bengaluru

(PCMC) Pre-University, St. Joseph's Pre-University College - Mar-2020-Bengaluru

(B.Tech) in Computer Science Engineering, Presidency University - Sep 2024-Bengaluru

Internships

Full Stack Developer Intern, Xpredict Automation Solutions, Bengaluru

- Contributed to the development of the company's website by collaborating with cross-functional teams. Designed and implemented the Customer Relationship Module to streamline customer interactions and improve CRM functionality. Utilized technologies such as Django, sql lite, and Python.
- Gained hands-on experience in full-stack development, from front-end design to back-end implementation, aligning with business requirements.

Python Full Stack Development, People Click Techno Solutions

Completed course and internship gaining hands-on experience in software development and enhancing my technical skills in Full Stack Development.

Projects

Customer Relationship Marketing (CRM) Software

- Developed a CRM software designed to manage and streamline customer relations, sales processes, and marketing campaigns. Built with Django

Django Projects - Employee and Customer Portals

- Developed a comprehensive web application in Django to manage both employee and customer information.
- Implemented features for CRUD operations, data validation, and dynamic user interface updates.

Doctor and Medicine Availability Website

- Built a web application to check the availability of doctors and medicines in government hospitals, allowing users to book appointments.

Node.js and React.js Full Stack Project

- Created a full-stack application using Node.js, React.js, and MongoDB for managing user profiles. Implemented RESTful APIs and worked with Postman for API testing.
